New range of modern Plaster in aluminum profiles - seamless profiles for recessing into plastered walls and ceilings for an incredible seamless diffused light output. Normal LED profile will make aluminum flange on the surface, but Dry-wall LED profile gives rimless LED linear light. We believe this Dry-wall LED profile series give more elegant and delicate LED linear lighting on projects. Believe this will be good choice for your commercial lighting projects.

Our MS-P8016 Profile is designed to be used in drywall skirting applications. The profile is anodized and therefore suitable to be coated in your desired color paint. The aluminum extrusion is designed to house our LED strip or LED Tape making it easy to create your own LED Skirting Lights. The aluminum LED Track affords excellent heat sink properties to provide maximum life to your led strip lights. This profile comes in two parts, the fixing profile and the front profile.
